Safety Flash

Spring 2015 Outage Publication for Upgrading and Energy & Utilities

June 18, 2015 Night Shift | June 19, 2015 Day Shift **ISSUE 81**

TODAY'S TOOLBOX TOPICS

Summarize today's toolbox topics during toolbox talks. Reading line-by-line is not necessary.

E&U ALARM REMINDER: Every Thursday at 9:00 p.m., the E&U evacuation alarm is tested. Personnel are not required to evacuate the area.

REPORT ALL INJURIES IMMEDIATELY: It is critical that you report all injuries immediately—even if it's a personal health matter. All injuries require medical attention and must be seen to as soon as possible. Early intervention and proper treatment can help reduce your chances of the injury becoming more serious.

KEEP A SAFE DISTANCE FROM WATER TRUCKS: Recently, pedestrians have been noticed walking very closely to water trucks. When you walk too close to the trucks, you could potentially get sprayed with the water. Remember, the water trucks are here to benefit all workers on site by controlling dust levels so give them their space to perform their work safely and efficiently.

PERSONAL GAS DETECTION MONITORS: In Upgrading, workers must wear a H2S detection monitor and in Energy and Utilities workers must wear a S02 detection monitor. When a gas detector alarms, evacuate immediately and report it to your supervision as soon as possible so they can notify Operations to investigate the source. Remember to regularly test your personal gas detection monitor to ensure it is functioning properly.

Safety Stats

SAFETY	LAST 24 HOURS	TO DATE
First Aid	0	8
Med Treatment	0	1*
Loss Time Injury	0	1

NO INJURIES THE LAST 18 DAYS—GREAT WORK!

**Previous Medical Treatment has been reclassified which has reduced the total by 1.*

The Weather

JUNE 18 (OVERNIGHT)	JUNE 19 (DAY TIME)
8°C	19°C
MAINLY CLEAR 20% P.O.P	MIX OF SUN AND CLOUD 20% P.O.P

WEARABLE TECHNOLOGY WARNING

Wearable technology devices are not intrinsically safe and have the same implications as the use of mobile phones in operating or classified areas. They also lead to distraction while driving and during the execution of work.

Please note that these devices are being treated the same way as cell phones in Upgrading—they are not permitted.

⇒ Review the manufacturer's user manual which explains the dangers associated with using the device in potentially explosive environments.

⇒ Remember that hand held cell phones &/or hands free devices are not permitted to be used while operating any Suncor owned vehicle on or off site.

⇒ Cell phones are strictly prohibited in and around all Upgrading Operating areas.

⇒ Review RGP0007A – HOT WORK PROCEDURE.
